ABOUT US

At SweetRobo, we value innovation, sensible business and, of course, whimsy. We're industry pioneers in design and technology, bringing the exciting, unparalleled future of robotics to the present. We believe in the paradigm shift toward robotic automation, providing efficiency, precision and low operating costs (not to mention fun). We wanted to create a product that could give everyone a taste of our vision.

We sell fully-automated machines that create flawless on-demand treats with the push of a button, turning the simple process of dispensing crowd-pleasing sweets into a truly enchanting experience. Ever watched a robot prepare your cotton candy or ice cream? Anyone – young or old – will be dazzled seeing their favorite treats come to life through our robotic engineering, genius programming and pleasing, unique design.

We've created a unique opportunity for the savvy entrepreneur seeking to add cutting-edge technology to their repertoire and deliver a playful, novel experience to their customers that they won't find anywhere else. Business people – particularly in the food, recreation and event industries – want to stay current and set themselves apart from their competitors, but may not yet have that "wow" factor that generates buzz. We've mastered the powers of automation and innovative design, eliminating the barriers associated with traditional food preparation and providing a truly modern take. Our machines can liven the atmosphere of just about any location or event – the possibilities are innumerable, and the future has never tasted so sweet.

Technical Support

Our technical support team is here for you 24/7. With support services in English, Spanish, Hebrew and Portuguese (we'll be adding more soon), we're dedicated to helping you with orders, installation, troubleshooting and more. Available for chat, text or video call, we're here for all your needs.

Easy Ordering

We want your new machine to arrive quickly and free of hassle. Our U.S.-based team handles payments, shipping and customer service for a no-nonsense, streamlined process that'll save you on time and headaches.

Design, Copyrights, Patents

SweetRobo's machine designs are fun, attractive and futuristic in appearance. Our in-house design studio is responsible for our user-friendly, one-of-a-kind programming.

Tracking App

We've developed a comprehensive app that enables remote management for your machines. Watch live video feed, chat with technical support, and get notifications on inventory, error messages and sales analytics right to your mobile device.

Training and Business Consulting

We're proud to help you pursue your next business venture. Our training and consultation services are designed to help you select the right products for your needs, assist you with starting or expanding your business, and will even help you select the best locations for your new machines. We're dedicated to helping you succeed, and will guide you every step of the way.

ICE CREAM ROBOT

Price: \$ 18,000

A tasty, timeless classic— who doesn't love ice cream? A decadent treat that's so popular, it sells year-round, even in the winter. Considering how much of a major crowd-pleaser it is, it's not hard to imagine the buzz, excitement and intrigue that our Ice Cream Robot will generate. Witness our adorable little robots take a fresh ice cream cup and move along a track inside the machine, diligently creating your fresh, made-to-order ice cream, complete with the syrup and topping of your choice. Kids, teens, adults and grandparents will be delighted and dazzled to see the powers of robotic innovation hard at work to dispense their personalized ice cream creations. Customers can select between 3 flavors, 3 syrups and 3 toppings for dozens of possible combinations. Precise, reliable and free of human error, you'll quickly see how traditional ice cream sales are a thing of the past!

Voltage: 220V 60Hz 1Ph.

Total Power: 6000W

Machine Dimension: L4.82 x W4.27 x H8.53ft (L1.47 x W1.3 x H2.6m)

Flavor of Product: 3 flavor (cylinder) + 2 mix , 3 sirup, 3 topping

Flavor Storage Capacity: 13 liters hopper (3 hoppers), 3 X 1.8 liters cylinder, Independent compressor for each cylinder

Customer Screen: 15" touch screen with Android system, user-friendly ordering system and 21" advertising TV Screen

Payment System: bill acceptor, Nayax credit card reader, coin changer

Interface Language: English

Packing Material Storage Capacity: 200~250 pcs 7 Oz paper cup

Automatic Functions: Air pump, Pasteurization (heat treatment), Alarm when icecream material is missing

Motion sensor activates when the next curious customer is near

Two speakers and robotic voice interaction with customers

Security camera - to keep your new machine safe!

Wheels for easy mobility

Preparation time of 1-1.5 minutes

A complete tracking app - so you can stay on top of sales, analytics and troubleshooting!

COTTON CANDY

Price: \$ 13,000

Flavors and shapes galore, oh my! Witness a simple, timeless treat transformed with the precision and sophistication made possible by robotics—our Cotton Candy Machine is as innovative as it is enchanting. Choose from 10 flavorful colors, select one of 30 possible shapes, and watch our adorable, tiny robots bring your delicious vision to life! Two little robot operators take a fresh paper stick and spin/form it precisely to create the unique shape of your choice. Carnival or amusement park cotton candy simply can't compete with our fresh, exciting take on it; our made-to-order, bespoke treats are designed for you, each and every time. Kids and adults, alike, will be completely dazzled by the process, so don't be surprised if your customers simply can't get enough!

Voltage: 110V,60HZ,1ph.

Total Power: 2000W

Machine Dimension: L4.6 x W2.46 x H6.56ft (L1.4 x W0.75 x H2m)

Flavor of Product: 10 colors sugar, 30 shapes

Flavor Storage Capacity: 10 holders for 1.5 liter sugars each
Stick Capacity: Maximum 250pcs

Customer Screen: 15" touch screen with Android system, user-friendly ordering system and 21" advertising TV Screen

Payment System: bill acceptor, Nayax credit card reader, coin changer

Interface Language: English

Packing Material Storage Capacity: paper pipe 250 pcs

Motion sensor activates when the next curious customer is near

Two speakers and robotic voice interaction with customers

Security camera - to keep your new machine safe!

Wheels for easy mobility

Preparation time of 1-3 minutes (depending on complexity of your chosen shape)

A complete tracking app - so you can stay on top of sales, analytics and troubleshooting!

POPCORN

Price: \$ 13,000

It's nearly impossible to imagine most sporting events, entertainment centers and movie theaters without popcorn—it's one of the most crowd-pleasing, classic snacks of all time! At most of these locations, however, popcorn is usually prepared in massive quantities at once, often left to sit in the popcorn machine for hours on end before reaching the customer. Our Popcorn Robot prepares the exact amount of popcorn for each customer, so your order is hot, fresh and made-to-order every time! Our unique machines are transparent so you can witness the entire process— it will show your freshly popped kernels flying out of more than a dozen tubes as they fall and are redirected to your fresh popcorn bucket; you'll want to watch it over and over again! Customers can choose classic popcorn or add 2 tasty flavored toppings for the delicious, fresh popcorn creation of their choice.

Voltage: 110V,60HZ,1ph.

Total Power: 5000W

Machine Dimension: Diameter3.61x H6.95ft (Diameter1.1 x Height2.1m)

Flavor of Product: Two flavor + one original flavor, two sirup

Flavor Storage Capacity: Holder for 6 Kgs corn, About 16 popcorn spray tubes. About 8 popcorn flow down tubes inside transparent tank

Customer Screen: 15" touch screen with Android system, user-friendly ordering system and 21" advertising TV Screen

Payment System: bill acceptor, Nayax credit card reader, coin changer

Interface Language: English

Packing Material Storage Capacity: 150 pcs 32 Oz paper cup

Motion sensor activates when the next curious customer is near

Two speakers and robotic voice interaction with customers

Security camera - to keep your new machine safe!

Wheels for easy mobility

Preparation time of 2-2.5 minutes

A complete tracking app - so you can stay on top of sales, analytics and troubleshooting!

CANDY MONSTER

Price: \$ 13,000

Kids will be utterly enchanted by our Candy Monster, a machine that sells adorable little monster-bags that need to eat their fill of candy, or else! Choose between 6 different monsters– all with different personalities and favorite candies– and select the ‘food’ they need (6 different mixed candies). Customers will have the option to purchase candy, alone (for when their monster is hungry and needs more), a new monster, or both. Kids will fall in love with their new monster-bag and the delicious candy combinations inside– they’ll be sure to remind their parents when their monster is running out of food, too! Watch the dazzling process of dispensing candies from our futuristic tubes right into a fresh, sealed bag, ready to go for you and your monster’s consumption!

Voltage: 110V,60HZ,1ph.

Total Power: 1500W

Machine Dimension: L4.27 x W2.3 x H8.86ft (L1.3 x W0.7 x H2.7m)

Flavor of Product: 10 types candy flavor

Flavor Storage Capacity: 10 Candy holders of 3 Kgs each

Customer Screen: 15" touch screen with Android system, user-friendly ordering system and 21" advertising TV Screen

Payment System: bill acceptor, Nayax credit card reader, coin changer

Interface Language: English

Packing Material Storage Capacity: 6 types monster bag and 10 pcs each

Automatic Functions: Make a smoke inside a window. Output candy from the round window, output the monster bag from the lower window. Show the sample monster in the round window.

Motion sensor activates when the next curious customer is near

Two speakers and robotic voice interaction with customers

Security camera - to keep your new machine safe!

Preparation time of 2-2.5 minutes

A complete tracking app - so you can stay on top of sales, analytics and troubleshooting!

BUSINESS MODEL

Not only you can built your own business easily, with little to no own capital, using this business model can also significantly increase sales of any business in any industry. Place these low maintenance vending robots in arcades, hotels, cinemas, stores and more.

Old Fashioned
Typically rented 4 walls shop

Utilities Cost: Higher consumption of utilities such as water, electricity and internet, resulting in high monthly bills.

Labor Cost: Payroll (employees and taxes) is highest cost of any bussiness.. At least one employee must be present in each location at all hours of operation.

Labor Complications: Dealing with last-minute emergencies, employer-employee conflicts, thefts, no-show and irresponsible employees.

Space of Consumption: Location and SqFt are the main factors when determining the monthly rent. As busier the location, as lower the vacancy. As bigger the place, the highest the rent.

Initial Costs : Own capital required for establishing the business.

after

Taste The Future New generation vending shop

Utilities: Utility bills significantly decreased, if not completely eliminated.

Labor Cost: The payroll decreased, nearly to none. One employee is able to maintain multiple locations at the same time.

Labor Complications: Business operation is not dependent on the attendance of an employee.

Space or Consumption: Easier to find availability, even in busier high-demand areas. Rent is lower, thanks to the fact that a small SqFt area is needed. Due to its small size and low maintenance, one can operate a few in the same location.

Initial Sosts: No need for own capital, cost is low to a minimum.
